TS2068: ADVANCED SYSTEM WITH A BIG FUTURE

Here's a success story for all of you who like to see the American free enterprise system at work. We all know the first TIMEX computer was more than a toy. In fact, it was more computer than most people ever realized. But it got caught in the middle of the computer price wars of 1983 and was strangled... a tremendous defeat for TIMEX. Business gossip sheets like the Wall Street Journal were predicting that TIMEX was going to fold it's computer division (They said that about Lee Iacocca and Chrysler, too... now very successful). In the spirit of free enterprise, guts, savvy, and just plain "Never say quit," TIMEX set themselves to the task of designing the best machine they could. They decided they'd rather be the best, not the cheapest. The result is the new TIMEX 2068 Professional computer.

Since it's quiet release in November, the TS2068 has been an overwhelming success. With very little advertising, it's been tough producing enough of them to keep up with sales. Every computer magazine and trade journal that's tested it has given it rave reviews. And for good reason. It's capable of 16 color displays with up to 512 X 192 resolution. It has a full typewriter format Keyboard with dual shifts, caps, and space bar. It has 72K of memory of which 24K is a sophisticated operating system and 48K is useable RAM. It's cartridge port can hold an additional 56K of programming. It's futuristic bank switching facility can handle up to 16 Megabytes of memory. This sort of memory is unprecedented... you haven't seen it in any other personal computer at ANY price. Programming the TS2068 is a cinch. It has the world famous Sinclair BASIC language... meaning one touch entry of commands along with extended functions not normally sold with a stock computer. For example, programming a sine wave on the TS2068 takes only 5 steps. It takes 15 steps on a Commodore 64. Concentric multicolored circles take 6 steps on the TS2068, 21 on the C-64. A Semi circle takes 2 steps, 16 on the Commodore 64. And, you don't have to wait until you run the program to find bugs. The TS2068 has automatic syntax error checking... it knows what commands you're supposed to give it and it tells you as you program!

The TS2068 has some remarkable visual capabilities. You can display up to 64 characters on the screen. The "screen" can be anything from a black and white or color TV to a green or amber monitor, to a composite video color monitor, to an RGB color/green monitor... it can handle the best monitors available, but since it doesn't have to, you can grow with it. There are sophisticated sound synthesis features, too. Up to 4 channels or sounds can be running at the same time, each somewhere in it's own 8 possible I tend to run off at the mouth a bit when I

write about this machine... there's so much to

tell. But, it'll have to be cut short to leave space for a description of the TS 2068 "System." It appears that TIMEX wanted to leave nothing to chance. Inis computer be so far ahead of things it couldn't fail. The first part of the system is the expansion bus. For approximately \$120, this unit provides the interface and controller for up to 8 of the new microdrives, a standard Centronics Parallel Interface, a standard RS232 Interface with selectable baud rate, a standard Composite video port, a standard RGB port, networking capability for an up to 64 computer network, CP/M mode with optional 32K of additional RAM, and an auxilary audio output jack. Essentially, the expansion bus permits you to connect your TS2068 to

virtually any peripheral on the market. Mass memory storage is another flexible part of the TS2068 system. Start out with the TS2020 Program recorder, only \$49.95. When you're ready, step up to the microdrives. These ultra high speed drives hold about 85K of storage and transfer 48K in approximately 9 seconds. You access files in 3.5 seconds. This is faster than many disk drives! The technology is in an advanced specially

1702 Oak Knoll Drive, Alexandria, MN 56308

BULK RATE U.S. POSTAGE PAID PERMIT No. 75

1:30

lubricated tape LOOP with stationary head. The extreme secrecy. I know that TIMEX is ready drives are inexpensive (about \$80) small, (about the size of a hockey puck), and you can

have up to 8 of them going at once! TIMEX has selected the Mannesman-Tally full size letter quality printer. Rather than go with a cheap 12 character per second daisy wheel printer, they opted for a top quality, 80 character per second dot matrix. It's a little more expensive, but a whole lot better. For example, this printer uses a rectangular dot format that meets edge to edge. Combined with a high density matrix, you get characters so close to typewriter quality, you'd need a magnifying glass to tell the difference. So, you can use it for important correspondence. Because it's dot matrix, you can also use it for graphics. Like I say, TIMEX wanted to cover all bases! The TIMEX version of this printer will sell for around \$325. However, until that version comes out, you can order the Mannesman-Tally labled one from us... it comes in Centronics parallel and sells for \$399.95. See our printer section for details. Software development is being Kept under

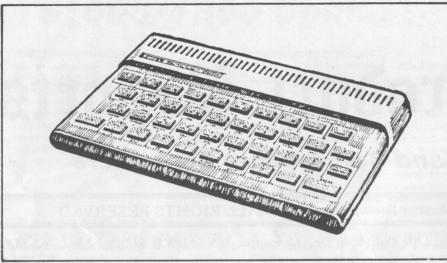

word processor, CP/M compatibility, LOGO, FORTH, and an ASSEMBLER. They've been looks of the new machine and the way TIMEX is striking deals with eager software companies to develop TS2068 versions of other software, too. Things that'll make the TS2068 competitive with IBMs, Apples, and their newest introductions. But, I couldn't weasel any more information out of them on this. You see, the computer and program recorder are the only parts of the system currently available. The rest is scheduled to come out all at once in June. TIMEX doesn't want to dilute the impact of it all by announcing anything until it's ready. Sounds like a new TIMEX doesn't it? You're right!

It used to be that drug wholesalers distributed TIMEX computers to stores. As an indication of the new way TIMEX is doing things, they've selected E. Arthur Brown Company as a distibutor/dealer. Now, they're looking for distibutors and dealers who know the products and can give full service to their customers. They've set up pricing schedules designed to give full service

dealers and distributors just as much competitive edge as chain stores. From the handling it, I'd say they're going to be around for a long time. I think this new TIMEX 2068 is going to be the next "Apple" ... and you know how long and fruitful a life THAT computer has had.

Now, you may be thinking of buying a computer. Before making a decision, take a look at what's being offered. There are alot of companies out there trying to be the CHEAPEST. Being cheapest means sacrificing research and development, advanced technology, quality, and workmanship, TIMEX is working on a higher standard of excellence. Why not a REAL computer? Remember, nobody was ever sorry he bought the best ... use the order blank in this publication and order your TS2068 today!

#100-124 TS2068 71b. \$179.95

TIMEX 1500

This upgraded version of the TS1000 offers some amazing utility. It features 16K of RAM, the now famous Sinclair BASIC operating system, and raised (but still water proof) Keys. Single Key entry of program commands will spoil you. Automatic syntax error checking helps you debug programs as you write them. You get all scientific functions, logic and math functions, plus graphics capabilities included in the purchase price. Hook the TS1500 up to our Mini Drives and you've got

MAIL ORDERS Use our order blank or any stationary. Be

sure to give complete shipping information (Name, Address, etc.) and include your account number. This number allows our order processing department to process your order approximately 4 times faster. It appears either above or to the right of your name on all correspondence, mailing labels, and packing slips we've sent you. If you're a new customer, we'll assign you a number upon receipt of your first order. Please add shipping charges as they are shown in the shipping chart below. Minnesota residents please add 6% sales tax. Mail your order to:

Printers

With such a variety of printers, it's hard

what you're going to use the printer for,

making a choice. But once you've considered

whether you plan to upgrade to a different

to spend, the choice should be obvious. First,

thermal printers are similar in print quality

to a 5 X 7 dot matrix, only they're faster and

more precise (full descenders on lower case

letters and a high number of dots per inch).

They're more compact, and their graphics

resolution is usually better than 5 X 7 dot

computer in the future, and how much you want

INTERNATIONAL ORDERS:

Credit cards are preferred to simplify collection of freight and handling charges. Use the shipping weights listed next to the price of each product when figuring the charges with our shipping chart.

BACK ORDERS:

We process orders immediately upon receipt. In-stock items are shipped the next day or within two days at the latest. Occasionally, on orders for multiple items, we may have one or two items on backorder. If so, we will ship stock. We pay any additional shipping charges that result from back orders. In any case, if there is a delay in filling your order, we will send you an FTC notice card within 30 days. You may cancel your order for a refund at any time prior to our shipment. If you cancel after we ship, you will be charged for the shipping charges. Please allow at least 14 days for delivery.

CUSTOMER SERVICE

If you have a problem with any of our products, call our customer service department. Most problems are solved over the phone. However, if you find it necessary to return an item, please:

1) Pack it carefully and include a copy of your receipt.

2) Write and enclose a letter describing the problem and what you want us to do about

3) Insure and mail the parcel to us. Orders damaged by the common carrier should be Kept in their original shipping container. Call us or the common carrier for handling instructions.

Our prices are subject to change without notice. If you're not sure of a price, please call or write for a current price list. From time to time we may run advertised specials in magazines. To qualify for these prices, your order must mention the name and issue date of the magazine. Advertised specials expire one month after publication.

COD shipments are charged a \$3.00 COD fee and whether or not the order is completely or partially shipped, the COD charge will be for the complete order including merchandise, shipping, and COD fee and will be payable in cash, certified check, or money order. Backordered items will be shipped prepaid following receipt of your COD payment. If your COD shipment is refused or returned to us for any other UNDELIVERABLE reason, you will be billed for shipping to and from your destination along with the \$3.00 COD fee.

OUR GUARANTEE:

All hardware items carry a 90 or 180 day manufacturer's warranty as well as our 10 day, money back, free trial guarantee. Try any hardware item in this catalog for 10 days. If it doesn't work or you just don't like it, send it back within 10 days of receiving it. As long as the product is in new condition, we'll either exchange it, refund your money, or credit your credit card for the full purchase price. Our only condition is that returned items must be in new condition, in their original containers, with all instructions, literature and documentation intact. Merchandise with modifications such as velcro stickers, rubber feet, tape, etc. will not be accepted.

All software/book sales are final. We will not issue refunds on software/book returns. We guarantee our programs to load and run on your computer. Defective programs may be exchanged for functional ones with the same title.

More Printers...

to be printed. Dot matrix printers are faster than daisy wheel printers, though... and quite a bit less expensive. If you need speed, an inexpensive dot matrix printer will do. If you need speed and quality, either a thermal printer or an expensive dot matrix printer should fit the bill. But if you're stuck on perfect "letter" quality, only a daisy wheel printer will do. In this case, you'll have to sacrifice some speed even if you spend a couple of thousand dollars. The fastest daisy wheels go only 50-55 characters per second. As for whether or not you should buy a printer that's made specifically for your computer, consider this: If you ever plan to buy another computer, your best choice is a standard printer with an interface for your computer. Brand specific printers only work with the brand of computer they're made for. Buy another computer and you'll have to buy another printer.

> ****IMPORTANT NOTE**** TS1500 Owners

At the time of this writing, our TS1500 CPI printer interface is not yet functional. However, we ARE working on it and expect it will be ready very soon. Call for

ALPHACOM 81 THERMAL PRINTER For Commodore VIC/64 computers, the "81" is an 80 column thermal printer with the same basic mechanism as the TIMEX 2040 printer. It prints upper and lower case characters with full descenders, uses white thermal paper in rolls, and is fully capable of high resolution graphics. Although it's not a Commodore brand of printer, it recognizes the complete Commodore print instruction set and is completely compatible with anything you want to print. The printer itself is compatible with other computers (not TIMEX), but we only sell it with the Commodore interface cable. Advantages of the Alphacom 81 are it's small size and weight (13 X 9 X 3 1/2 inches at 6 1/2 lbs), it's high speed (80 characters per second), it's high resolution (80 dots per inch), and it's low price for a printer having those features. Other features include

TIMEX 2040 THERMAL PRINTER For all TIMEX computers, the 2040 is an affordable printer with a high quality, 32 character wide, white paper printout. It prints at a rate of one line, or 32 characters per second and needs no special interface to connect to the Sinclair ZX81 or TIMEX 1000/1500/2068 computers. The 2040 operates from the standard TIMEX-Sinclair print commands, so it's compatible with commercial software. It prints on white thermal paper that looks and feels like fine, coated stationary. There's no metalized surface to smear or scratch. You get quality printouts that are easily photocopied... or cut for mailing labels. The print mechanism can handle high resolution printing and even lower case letters (with our High Resolution Word processor). Printout looks similar to full size dot matrix printers.

#100-350 TS2040 5 lb. \$89.95

continuous and bit mapped graphics with the complete Commodore character set, carriage return, line feed, and form feed. This printer is not compatible with TIMEX computers. But if you have a Commodore VIC or 64, it's an excellent choice. The total price of the printer and interface cable is just \$199.95. Order your's today!

#200-355 Alph 81 8 lb. \$158.05 #200-356 VIC/64 Cable 1 lb. \$41.90

THERMAL PRINTER SUPPLIES

We carry a complete line of paper products for your TIMEX, Alphacom, or other thermal printer. Paper rolls for the TS2040 are 85 feet long by 4 1/4 inch and come with either blue or black printout in packages of 4 rolls. Paper rolls for the Alphacom 81 are also 85 feet long, but they're 8 1/2 inch wide. These are also available in blue or black printout and come in packages of 2 rolls.

#111-405 Black 2040 Paper 2 lb. \$8.95 #111-406 Blue 2040 Paper 2 lb. \$8.95 #111-408 Black "81" Paper 2 lb. \$10.95 #111-409 Blue "81" Paper 2 lb. \$10.95

SEIKOSHA GORILLA PRINTER For Sinclair ZX81, TIMEX 1000, Timex 2068, and Commodore VIC/64 computers. The Gorilla is printer with characters so sharp, you need a a full size dot matrix impact printer (5 X 7 format) that provides up to 80 columns (characters) of print width. The tractor paper feed mechanism is adjustable for different widths of paper, so you can run any number of standard forms through it. Impact is hard enough to get through one original and 2 carbon copies. You can print standard upper and lower case letters (no descenders) and even double width characters. A graphics print mode is provided, so you can print anything from charts and graphs to computer art. Print speed on the Gorilla is 50 characters per second. To connect it to your TIMEX 1000 you'll need a TS1000 Centronics Parallel Interface. The TS2068 needs a TS2068 CPI. To connect it to your Commodore VIC/64 you'll need our Commodore Centronics Parallel

Interface. #101-350 Gorilla 13 lb. \$199.95 #101-400 TS1000 CPI 2 lb. \$99.95 #101-413 TS2068 CPI 2 lb. \$89.95 #230-400 Commodore CPI 1 lb. \$79.95 #112-400 Gor. Ribbon 1 lb. \$11.95

MANNESMANN TALLY MT-80 T

Here's a high speed, high quality dot matrix magnifying glass to tell them from typewritten! The secret is a revolutionary "square" dot mechanism. The dot edges meet more exactly, showing little or no space between. The 7 X 8 matrix is printed at 80 cps, with a bidirectional(logic seeking) print head and both tractor and friction feed. You get Pica, Italic, and pica bold print styles in 10 or 12 pitch. You get condensed mode, super and subscripts, underline, and emphasize along with international character sets. TIMEX 1000 owners will need the TS1000 Centronics Parallel Interface. TS2068s need the TS2068 CPI. Commodore 64 owners will need the Centronics Interface and Power cable. The MT-80 uses the same commands as an Epson MX-80 with Graftrax Plus. It's a better printer at a lower price! List is only \$399.95, but we've been able to cut it even lower than that!

#295-355 MT80 Printer 15 lb. \$374.95 #295-401 Ribbon 1 lb. \$12.95 #101-400 TS1000 CPI 2 lb. \$99.95 #101-413 TS2068 CPI 2 lb. \$89.95 #230-400 Commodore CPI 1 lb. \$79.95 #230-401 Power Cable 1 lb. \$5.95

The A10-20 DAISY WHEEL PRINTER By C. ITOH

C. Itoh, creators of the famous "Star Writer" daisy wheel printer, has applied their expertise to a lower priced version. The A10-20 is a direct descendant of Star Writer technology and it's features show it. It has a static font impact system with 115 to 138 characters per line. Print speed is 18 c.p.s. The platen is long enough for serious business use... it accepts paper up to 15 inches wide. You can use cloth or multi-strike carbon ribbons for super clear characters. Available pitches are 10, 12, and proportional spacing with 100 characters per print wheel. The number of type styles is limited only by the number of print wheels you buy! Paper feed is bi-directional which makes for excellent graphics capabilities. And at less than 62

decibels, the A10-20 is remarkably quiet for a daisy wheel printer. Connection to your ZX81,TIMEX 1000, requires the TS1000 Centronics Interface. TS2068s need the TS2068 CPI. Connection to your Commodore VIC/64 requires our Commodore Centronics Parallel Interface and the Supplementary Power Cable. There are other inexpensive daisy wheel printers, but none to match the A10-20 ... it's like getting a Star Writer for hundreds of dollars off! One print wheel is included. Others available.

Keyboard Enhancements

TS1500 KEYBOARDS FOR THE TS1000/ZX81 Our newly designed Mark I Keybutton overlay is the exact same, molded rubber button type Keyboard as is on the TIMEX 1500, only it's smaller... to fit the ZX81 or TS1000. The sensitivity and efficiency are exactly the same, only you don't have to buy a new computer to get them! Legends are printed right on the Keys and board, just as they are on the TS1500. To install, you just peel off the backing and stick the Mark I onto your old membrane Keyboard. No wiring or soldering! We even supply a blank overlay that you can label yourself for special applications like games. word processing, or spreadsheet work. Upgrade your TS1000/2X81 to a TS1500 for a fraction of the cost of the new computer. Order the Mark I today. You'll be surprised at how inexpensive it is!

#106-325 MKI Ovrly 1 lb. \$14.95

MKIV KEYBOARD KIT For ZX81 and TIMEX 1000/1500 computers. The MKIV kit is an economical way of getting a top quality, full stroke typewriter Keyboard. The best part of the Kit is the Keyswitches. They're the very same ones as are used on Hewlett-Packard and DEC computer Keyboards You get reliable contact with practically no wobble. The Keytops are gray with black and red sublimated legends. Sublimation impregnates the color right into the plastic making it virtually impossible to wear them off under normal use. The kit includes the instructions, Keyswitches, Keytops, circuit board, and ribbon cables for connecting to your computer. Soldering is required. The case shown in the photo is no longer available. But you get 6 more Keys than the cased version... wire them for special functions if you like. Make your own case to hold your computer,

Great Memories

For ZX81/TS1000/TS1500 Computers one terrifically powerful computer!

TIMEY 1016 16K RAM On ZX81/TS1000's, this RAM disables the 1-2K internal memory and replaces it with 16K. On TS1500's it adds to the already present 16k giving you a total of 32K! It's just a matter of plugging it on the back of your computer

and you're ready to go #100-216 TS1016 1 lb. \$49.95

MMRY-REZ 64K RAM The only TS1500-Compatible 64K The only 64K in the world that works with the TS1500 computer! The MMRY-REZ 64K is for ZX81/TS1000 and TS1500 computers and features a switchable 8-16K region and high resolution graphics circuitry. It even has it's own ribbon cable for "rock stable" mounting on your computer. No wobble crashes with this

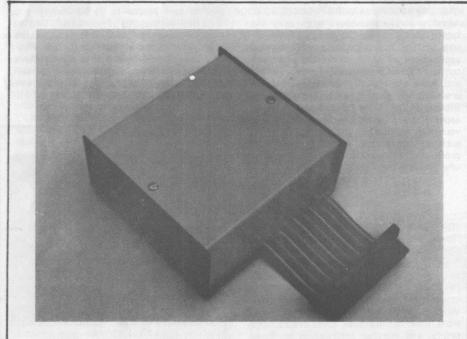

unit! MMRY-REZ provides the full 64K of memory CLOSE OUT RAMS for your Z80 microprocessor and the switchable 8-16K region makes it compatible with EPROM battery backed up RAMs. These RAMs will software and interfaces which also reside in those addresses. The high resolution circuitry allows you to do super clear graphics... 192 X 256 pixels. But, it also comes with high resolution software on cassette. You don't have to do elaborate USR and POKE programming at \$58.95, we're closing them out at \$39.95. routines. For example, to draw a circle, you press "C", enter the radius, and instantly a circle is drawn. Lines and other geometric

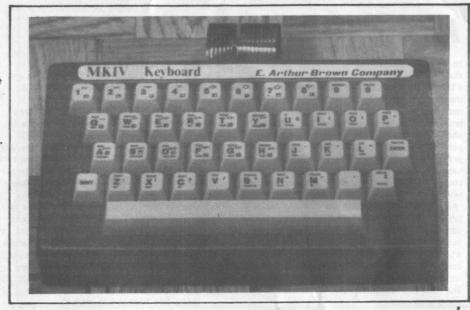

shapes are just as easy. And, you can use these figures on four different screens. The Our memory modules can turn your TIMEX into computer can then switch rapidly between screens creating animated graphics! If you wish to get even more intricate with your MMRY-REZ, we recommend ordering the Advanced Software cassette. It's an even more sophisticated graphics package than the standard software. The important things to remember are that your MMRY-REZ 64K functions as a standard 64K when you want it to, it includes High Resolution Circuitry and the basic High Resolution Software cassette, and it's the only 64K that works with all three, the ZX81, TS1000 and even the TS1500! Also available in kit form which includes everything but the IC (Integrated Circuit)

Mass Memory Storage

TIMEX 2020 PROGRAM RECORDER V While TIMEX computers are designed to operate with standard cassette recorders, the TS2020 with ZX81 and TS1000 computers, have a through recorder is designed specifically for TIMEX computers. It features automatic recording adjustment for optimum LOADs. The 2020 also cassette port of your computer and gives playing and is priced in the range of a good cassette based software, or save your own standard cassette recorder. Customers who've programs and data to cassette.

the 2020 does it right every time! #100-305 TS2020 2 lb. \$47.95 #100-308 AC Adaptor 1 lb. \$8.95

VIC 1530 DATA RECORDER level adjustment for proper SAVE volumes and a Inexpensive data and program storage for your Vu/Level indicator light to assist your volume Commodore VIC or 64. The 1530 plugs into the works fine for speech and music recording and reliable LOADs and SAVEs. It allows you to use had previous trouble LOADing and SAVEing, find #300-300 VIC 1530 Recorder 4 lb. \$94.95

TIMEX 1510 COMMAND CARTRIDGE PLAYER This unit allows you to play cartridge software on your ZX81, TS1000, and TS1500 computers. Just plug it onto the expansion port and plug the cartridges into it. The 1510 and/or printer onto the back. Even a 1-2K for the program. Check our software section for compatible cartridge software. #100-300 TS1510 2 lb. \$19.95

QSAVE HIGH SPEED CASSETTE STORAGE For ZX81, TIMEX 1000, and TIMEX 1500 computers. QSAVE is software that changes the data transfer speed for faster LOADs and SAVEs #105-303 SPEEDLOAD 1 lb. \$59.95 on cassette recorders. For example, 16K of program/data normally takes 7-8 minutes to

and works for either 16 or 64K. It includes an amplifier/filter and cables. This version of QSAVE loads to RAMTOP in a 16K RAM and to the 8-16K region of a 64K RAM. It works with any program you can BREAK into and get a cursor to give QSAVE commands... as long as the program doesn't overrun RAMTOP and ERASE QSAVE (this occurs with ORGANIZER). The Cassette version on a 64K RAM may not be compatible with other peripherals such as the Centronics Parallel Interface. This is because you turn off the nemory in the region needed by QSAVE. The MOST compatible QSAVE is the EPROM version. This unit provides it's own memory in the 8-10K region of 16 through 64K of RAM. It works with any program that'll BREAK and give you a cursor (this includes ORGANIZER). The EPROM version of QSAVE comes with the amplifier/filter and cables. Or, you can purchase the EPROM only if you already own a has a through-plug so you can attach your RAM QSAVE cassette version. You will need either a 2 or 3 port ribbon cable with any QSAVE on computer can play 16K cartridge software with EPROM. The QSAVE cassette version is NOT fully the 1510! The cartridge provides the memory compatible with the TIMEX 1500 computer. A new version called SPEEDLOAD is available for the 1500. SPEEDLOAD is an EPROM and requires no amplifier/filter. It comes with a 3 port ribbon cable and functions the same as QSAVE in every regard, only it's made for the TS1500. #105-300 QSAVE Cassette V. 1 lb. \$38.95 #105-301 QSAVE EPROM V. 2 lb. \$59.95

TS1000/1500 Mini Drives We've finally found a disk system that everyone can use on their ZX81, TS1000, or TS1500. Our Mini Drives are the new 3 inch disk drives... small, but with plenty of memory room. Unlike earlier disk drives, these are easy to configure for your cassette based software. They save everything the same way your cassette does, only much much faster! These drives are compatible with our TS1000 Centronics Parallel Interface. A TS1500 CPI will be along shortly. Minidrives are NOT some Rube Goldberg set up that takes an electrical engineer to figure out! They're a finished commercial system that anyone can handle. They offering a completely packaged disk drive come complete with one drive, disk interface, power supply, housing, an instruction manual, and a manufacturer's guarantee of one full year on the interface and power supply. If you

want dual drives, you can purchase an extra 3 inch drive which will fit neatly alongside the other in the housing.

#223-300 Mini Drive 20 lb. \$549.95 #223-301 Extra Drive 10 lb. \$250.00

TS2068 DISK DRIVE INTERFACE

Connect your TS2068 to any Shugart compatible disk drive. This new interface will be ready for shipment in April and is compatible with our TS2068 Centronics Parallel Interface. Buy it now and you can connect it to the Shupart drive of your choice. In June, we'll be system which will include the drive mechanism. Realize the potential of your TS2068 with a disk drive!

#232-305 2068 Dsk.Itfce. 2 lb. \$199.95

Our new single and dual Superdrives for

Commodore computers are a case in point.

stay on all day, day in and day out, without malfunction. Superdrives have Futuristic Self Diagnostic Systems built right into them. How important is that data in your disk files? Can you afford to lose any of it through disk drive malfunctions? Of course not! Everytime you power up, your Superdrive gives itself a complete physical. If anything's wrong, it'll tell you... before you insert your valuable disk files into it. Cheaper drives don't have this feature and can't warn you of trouble. You won't find out about a problem until after

means the chance of slippage is practically

occurence. The beige colored Steel housing

nil. Overheating is also a never seen

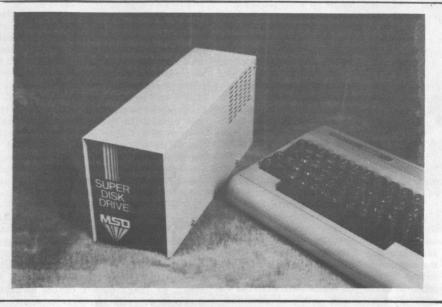

acts as a large heat sink... drawing heat

away, rather than holding it in. "Industrial

Quality" means Superdrives are designed to

your disk files have been damaged. Superdrives come with Two Serial Ports. One to connect your computer and the other to "Daisy-chain" to another peripheral device such as a printer. But, you also get a Fully Functional IEEE Port! IEEE interfaces transfer data much faster than serial interfaces. By connecting your Commodore 64 to the IEEE port, you enter into a whole new realm of high speed data processing. This connection requires our IEEE interface... described elsewhere in this brochure. Some customers have asked why we don't run the IEEE feature directly through the serial port. The reason is because this would require interfacing software inside the computer memory... bringing in problems with software compatibility. With a Superdrive, you can have both IEEE speed AND software compatibility. The IEEE port also makes your diskettes. Superdrive compatible with other Commodore omputers such as the PET. This is due to the

Every now and then a new product design seems intended to last forever

They're built around Industrial Quality Drive disk instruction set. So, you can rest assured that your new Superdrive will be Totally Compatible with your Commodore 64, Vic 20, or Superdrives are loaded with extras not found on cheaper drives. Each one has an Extra 8K of RAM inside the disk unit. Extra memory is always useful and 8K of it can cost as much as Diskette Formatting. All Floppy disks must be formatted before you can use them. Superdrives make the slow and tedious formatting procedure go much faster. Superdrives come in Both

cabinet. This makes for more convenience with a dual system, since you can keep your programs on one drive and your data on another one. You spend less time inserting and removing diskettes. Superdrives handle 5 1/4" single sided double density diskettes with a capacity of about 175K. They come with extensive documentation, serial cable, power cable, and a comprehensive instruction manual. All you do is plug your Superdrive in and it's ready to There's really no comparison between the Commodore 1541 disk drive and a Superdrive. The 1541 was built to sell at a low price. Compromises had to be made in design,

Superdrive's Sophisticated 16K ROM Operating

System . It recognizes the complete Commodore

materials and workmanship to accomplish the low selling price. Superdrives are built to give exceptional service. There were no compromises. Perfection such as that IS expensive. But then, you'd expect to pay more for industrial type reliability, versatility, safety, and all of the other extras built into a Superdrive. Remember the old saying, "No one was ever

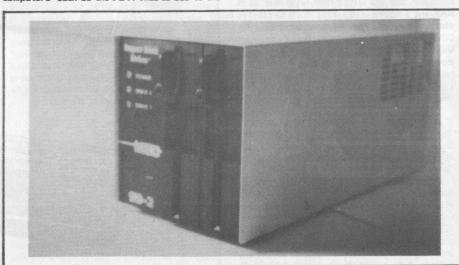

sorry he bought the best." It goes doubly so for disk drives. Pay a little more for a trouble-free Superdrive and you'll never regret it. Experience the reliability and quality of a Superdrive and you'll know what we mean when we call it "DISK DRIVE EXCELLENCE."

TIMEX 2050 MODEM

SANYO DMC 6500 COLOR MONITOR -> You wouldn't believe how hard it was to find the right color monitor for Commodore and that you've convinced yourself that have needed an RGB monitor. Well, the DMC 6500 is a combination composite AND RGB color monitor! TIMEX 2068 owners will appreciate this, since you can get 32 or the full 64 character color displays right now... using your composite output. And when the Microdrive interface comes out, you can connect the same monitor to the RGB port and get the even clearer picture only possible with an RGB system. You Commodore owners will be able to use the clearer RGB features as soon as a suitable interface is developed. In the mean time, the composite mode will give a clear, accurate picture for 40 to 80 columns width. The composite connectors are standard RCA type... so TIMEX owners can use the cables that came with your machines. Commodore VIC/64 COMBINATION composite/RGB DMC 6500 monitor owners be sure to order our monitor cable. General features of the DMC 6500 include a 13 inch diagonal screen, intensity input for 16 color RGB, audio amplifier and volume control, black matrix-quick start CRT, and an optional green display in the RGB mode. Controls include: Power, volume, color, tint, brightness, contrast, H-Center, V-Hold, RGB/Composite, and Green Display. We do have a #216-450 DMC 6500 30 lb. \$399.95

more technical spec. sheet.. just call or write for a copy. Now for the best news. Even though RGB Monitors are expensive (Amdek RGB Monitors list around \$700 and above), Our lists for only \$495.00. We were able to fanagle a special purchase on them though, and are offering them at the low price of \$399.95... that's comparable to 40 column composite video monitors! We don't know how long we'll be able to offer the DMC 6500 at this price, so don't delay. Order your's

MONITOR CONVERSION KITS

For TIMEX 1000/1500 computers. Kit changes visual output to direct composite video... making connection to our green screen monitors possible. Comes complete with components and

#220-450 Mon.Con.1000 1 lb. \$19.95 #220-451 Mon.Con.1500 1 lb. \$19.95

COMMODORE VIC/64 MONITOR CABLE Use our monitor cable to connect your Commodore to any composite video monitor. It consists of a 5 pin DIN type plug on one end, and four RCA type phono plugs on the other end. The four phono plugs are color coded and make the cable compatible with color or monochrome monitors. Two of the plugs are for audio if you have a monitor equipped for sound dike our DMC 6500). These cables will work fine for connecting your VIC-20 or Commodore 64 to the monitors we sell as well as other industry standard monitors.

#230-450 Cable 1 lb. \$19.95

SHIELDED TV CABLE

The unshielded TV cable that came with your Commodore/TIMEX computer acts very much like an antenna. It can and does pick up radio frequency interference... which translates into a wavy display on your TV screen. Our 4 foot shielded coaxial cable doesn't pick up

the old cable and plugging in the new one. #115-405 Cable 1 lb. 14.95 THE VIDEO INVERTER A fun addition to your Sinclair ZX81 or TIMEX 1000 computer. The Video Inverter changes your TV picture from black letters on a white background to white letters on a black background. You can switch to whichever

picture. The plugs are the same RCA type you

now have only the cable is shielded.

Installation is only a matter of unplugging

display best suits the computing you're doing because the unit comes with a toggle switch. Background can be adjusted from totally black to gray using your TV controls. Installation requires opening the computer case. Four solders must be made and the toggle switch installed. Note: Our inverters have been custom made with extra long toggle switch leads. This allows you to install them anywhere on your computer. Other inverters must be installed at the back of your computer... where they interfere with your RAM and other peripheral add-ons. We offer both VHF and UHF versions of the inverter. If you order our UHF conversion kit, be sure to specify the UHF Video Inverter.

#117-400 VHF Inverter 1 lb. \$16.95 #117-401 UHF Inverter 1 lb. \$16.95

UHF CONVERSION KIT For Sinclair ZX81 and TIMEX 1000/1500 computers. TV channels 2 and 3 are especially sensitive to radio frequency interference generated by your computer. UHF channels are much less sensitive ... especially in the area of channel 33. Our UHF conversion kit changes your computer output to channel 33-UHF and clears up virtually all interference. The result is a crystal clear picture no matter how many peripherals you attach. The kit comes complete with a replacement UHF modulator and instructions. Some soldering is required.

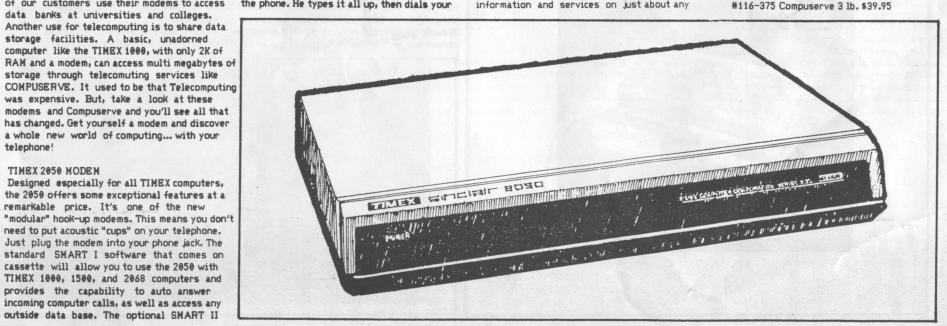

#137-400 UHF Kit 1 lb. \$19.95

number. Your TIMEX answers the phone (even if subject you want. With compuserve, you can you're not there) and receives the message in an instant. When you get home, you check the computer for messages, see one present, and You can use your TIMEX or Commodore computer software comes on cartridge and provides auto have it printed out! HI-REZ WORD PROCESSING 16-64K Our new HI-REZ word processor actually displays it's own set of lower case letters and gives a full 64 character display on your screen. Output to your TS2040 printer can give the usual 32 character width, or 64 characters printed out sideways on the paper! You can print either the whole text or a screen at a time. Text entry is high speed and flicker free with a thin underline for a cursor. It has full repeating Keys, insert, delete, or move text. All text is automatically comes up in lower case with capitols in the graphics mode. Of course it has word wrap and complete editing features. And, it works for 16-64K of memory. Designed for the TS2040 printer. This is the program you've been asking for: Lower case letters AND 64 character display right on

your screen! #275-600 Hi-Rez Word Pr. 1 lb. \$24.95

ZX PROFILE 16-64K

by Thomas Woods Thomas Woods is a man obsessed with proving the worth of the TS1000/1500 computer. His diligent work on this program has produced, clearly, the best data filing system available. First, it works for 16-64K of RAM... so it holds enough information to be useful. You can output to your printer in any order you choose. You can add new files, edit or delete existing files. ZX Profile is flexible. Files and records can be as big or small as you want them. Search facilities allow you to find records based on any word or words in the record. Time consuming functions are in machine code, but the rest is in BASIC... making modifications simpler. Even printer functions are definable. Probably the best feature of ZX-Profile is it's optional analysis capabilities. You can do counts, calaculate percentages, analyze frequencies, etc. Documentation is excellent. A 59 page manual tells how everything works and how to modify the program for special applications (ie. large printers, disk drives, stringy floppies, etc.) Use this program for storing scientific, personal, business, inventory, or

club records. #298-600 ZX Profile 1 lb. \$15.95

TAX COMMAND 16K

We may be a little late with this one, but if you haven't done your taxes YET, maybe you better get some help from your computer! It includes Form 1040, Schedule A (deductions), Capitol gains, Income averaging, and 1983 tax tables. Let your computer figure your taxes,

KRAZY KONG 3 pak 16K

Very much like the arcade Donkey Kong, only the TS1000/1500. The object is to reach the damsel in distress at the top of the skyscraper avoiding the obstacles that Kong tosses in your way. This cassette includes Ghost Hunt game and Stopper, machine code program breaker. Alot of fun and a good 105-700 Krazy Kong 1 lb. \$17.95

MOTHERSHIP 16K

Another 3 dimensional game, you sit in the cockpit of your Starlight Fighter flying mere inches from the sides of the Zorway space corridor at screaming speeds. There's plenty of starship blasting and fancy flying with 3-D all the way. A very exciting game as you pursue the Mothership.

#125-700 Mothership 1 lb. \$15.95

QUEST FOR THE HOLY GRAIL A daredevil archeology professor, you search for the Holy Grail on a volcanic island. Read the clues, outwit the Nazi, evade the

that lead to the Grail. As a bonus, you also get THE ELUSIVE MR. BIG program... another adventure game. #125-705 Holy Grail 1 lb. \$16.95

cannibals, and descend into the passageways

SPACE COMMANDO

You are commissioned to infiltrate Zircon 12 so that your space fleet can land and defeat the renegade androids. Be prepared for some pretty gruesome clues! This is an adventure

#125-710 Space Commander 1 lb. \$14.95

SUPER CHESS 16K

Play Super Chess with your computer and match your gut instincts with the wonders of computer logic. You'll probably lose! With 10 levels of play, tactical or positional evaluation, move analysis, all legal moves, standard openings catalog, excellent graphics, display of up to 15 previous moves, and computer recommended moves, this is the best computer chess game available. There's even a self play mode that lets you watch the computer play itself.

125-720 Superchess 1 lb. \$18.95

FOREIGN LANGUAGES 16K

Can an American learn a foreign language from a computer? You bet! These programs teach the basic vocabulary and phrases of German and French. You learn over 240 words and 50 phrases in each language. These are crash courses in foreign communication for students, travelers, business people... whatever. It you're going abroad, these programs are an

#100-820 German 1 lb. \$10.95 #100-825 French 1 lb. \$10.95

STATES AND CAPITALS 16K A self teaching tool with a map of the United States. Enables memorization of lacation and name or states and capitals. Available on cartridge for 1510 Command Cartridge Player. #100-838 St.&Cap.Cartridge 1 lb. \$19.95

Learn the basics of instrument flight with an artificial horizon and full instrumentation. It's not as easy as you might think! After using a map and radio navigation beacons you'll hopefully be lined up with the runway, ready to land, and still have some fuel! Landing is an altogether different proposition. A visual runway is displayed along with your instruments and you descend at the right rate not to crash and not to overshoot. Graphics are excellent and the

while to master it ... then you can add wind effects! Available on cassette and cartridge. #100-835 Flt.Sim.Cassette 1 lb. \$19.95 #100-836 Flt.Sim.Cartridge 1 lb. \$19.95

techniques are challenging. It'll take you a

Basic BASIC 2K

A series of 2K programs which take the beginner through the construction of a simple game program. They use a program-by-example technique to teach programming. You get the programs on cassette, a blank cassette for saving your work, and a workbook that includes diagrams, tips about easy ways to edit programs, and LOAD/SAVE techniques.

#136-820 Basic BASIC 1 lb. \$17.95

SUPER MATH 16K Drill yourself or your child in the four

basic math functions with 5 levels of difficulty. Each problem is graphically depicted and a final grade is given after each 10 problems. An excellent teaching facility that provides ongoing feedback as students progress through each challenging level of difficulty. Available on cassette or cartridge for TS1510 Command Cartridge Player.

#100-870 S.Math Cassette 1 lb. \$14.95 #100-871 S.Math Cartridge 1 lb. \$19.95

PROGRAMMING AIDS

MCODER 3 PACK 16K Write and debug your program in BASIC and then MCODER compiles it into high speed machine code. It supports the basic math functions but not trig. and logic. Those sorts of programs would have to be compiled partially in BASIC and partially in machine code. MCODER makes for much faster running programs however you use it. This package has two bonus programs in addition to MCODER. Assembler/Debugger and Stopper to BREAK

machine code programs. An Exceptional value. #105-900 MCODER 1 lb. \$23.95

191000/1900 60114...

SPECTREX GRAPHICS 32-64K provides high resolution graphics and three dimensional design facilities. For example, you can design a figure, shade it, and rotate it... all with your computer. It contains it's needs alot of memory. You'll need a minimum of 32K with this one.

#114-901 Spectrex 1 lb. \$24.95

TS1000/6502 CROSS ASSEMBLER 16-64K This software takes TIMEX 280 mnemonics and our Graphics Kit if you want... providing a cross assembles them into machine code that superb combination of graphics and toolkit runs on computers with the 6502 microprocessor. This means you can use your TIMEX 1000/1500 to write programs for the Commodore VIC/64, Apple IIE, and other 6502 based computers! Commands include: Insert, Delete, Block Delete, Modify, Save, Load, Compile, List (to screen or printer), and Symbol Print. It also permits use of labels for branches or jumps. This is quite a sophisticated utility. It was produced for us by a company that uses the Timex 1000 to program computerized wheel balancing systems!

#220-900 TS1000/6502 Comp. 1 lb. \$24.95

PROGRAMMER'S TOOLKIT An exceptional value, the SPECTREX program Features line renumbering including GOTO's and GOSUB's allowing you to open up space for more program steps or just neaten up your programs. The Free space function tells how many bytes of memory you have remaining in own high resolution software, so SPECTREX RAM. A Search and Replace function changes the occurence of characters and commands as you require. There's even a tape routine that provides a system wait condition until a signal is received from the cassette player. For graphics, a hyper-graphics mode instantly fills the screen with any character you choose. Reversing the screen is possible too. This program is made to be co-resident with functions. Everything is in machine code to take up little memory and run fast. 125-900 Programmers Toolkit 1 lb. \$14.95

> Gives 23 machine code graphics routines Print position can be altered by commands: UP,

including DRAW/UNDRAW, BORDER/UNBORDER, FOREGROUND ON/OFF, REVERSE, and many more. DOWN, LEFT, RIGHT. You can scroll up and down and you can even turn your screen on and off. You also get SEARCH and REPLACE and BACKGROUND ON/OFF. An excellent utility!

#125-905 Graphics Kit 1 lb. \$14.95

Panasonic VCR's \$14.95

Yes, you can have your very own Panasonic Video Cassette Recorder for only \$14.00! These VCRs normally sell for up to \$700.00 in stores. Not only that, you also get two "first run" movies (with exchange priviledges) from our extensive video movie library! If you haven't guessed it yet, this \$14.00 price is much less than the package costs. How can we sell them that cheap? Well, there's really no trick to it. It's part of an exciting program designed to introduce more people to the booming Video Cassette Recorder business. We're a nationwide distributor of VCRs looking to establish small VCR businesses throughout the country. You can be a part of this booming industry and be your own boss, too! We have an information package that describes our business plans and how you and your friends can get Panasonic VCRs for \$14.00. The package is expensive to print and mail, so we do charge for it. For your copy, please send \$2.00. If you'd prefer to call, we do accept VISA and Mastercard.

100-216	TIMEX 16K RAM	\$29.95

Discount Policy

No Retroactive Pricing Notice This supplement contains several products with prices discounted. Every time we lower a price, we get a few requests for credit from customers who paid the higher price. As our ordering information states, our prices are subject to change at any time. Discounts are only possible if our cost goes down. If you paid a higher price, you bought when our cost was higher. We reserve the right to make a profit ... which is only possible when we sell something for more than it costs us. To avoid any hard feelings and misunderstandings, we're letting you know ahead of time: Discounted Prices Apply Only To New Orders And Only While Supplies Last.

To dress up your report or to emphasize a point you can

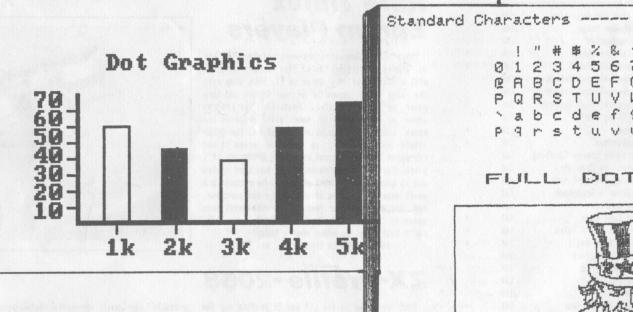

expanded print at 5 CPI, expanded print at 8.25 CPI, or 10 characters per inch for up to 80 columns, or 16.5 characters per inch for up to 132 columns.

Double strike, italics & emphasized style.

For scientific reports you can use Superscript (E=MC2) and Subscript (H20)

Phenomenal price & performance --- for as little as \$399 Spirit offers performance normally associated with highe
